Sir:

In response to the Office Action mailed February 23, 2004, please amend the  
above-identified application, as follows:

31/25/2004 000000 00000000 198740 10510043

disposed in opposing relation to the barrier wall, is adapted to operatively engage the barrier wall when in a closed position. There is no suggestion to modify the electrical connector of Herlinger et al. to include the blocking member taught by applicant.

Indeed, to modify the Herlinger connector in such a manner would require modifying and/or rearranging the entirety of the elements of the referenced connector.

Because there is no evidence to support the conclusion that one would have any motivation to make the necessary changes in the Herlinger et al. device to render claim 9 unpatentable, applicant respectfully requests that the obviousness rejection be withdrawn.

Please note that the inventor's first name is incorrectly spelled on the filing receipt due to a misspelling on the filing papers. The correct name of the inventor is: Sebastien Annequin. Applicant requests that the inventor's name be corrected in the Patent Office records.
